

Get ready for the road ahead.™

2008 product catalog

## *When the Open Road Beckons . . .*

Be sure you and your vehicle are ready with functional, stylish and durable AVS brand products. Ever since the original Ventvisor™ was introduced in 1935, motorists have depended on AVS for easy-to-install, practical accessories that also add a touch of style and personality to their vehicle.

No matter where you're going, AVS brand accessories can make getting there half the fun. Get AVS and **Get ready for the road ahead.**

## All Roads Lead to Chrome

Enthusiasts have been adorning their vehicles with chrome since chrome was invented. While other styling fads have come and gone, chrome has stood the test of time. Now, AVS brings the classic beauty of chrome to a full line of durable, easy-to-install accessories.

Don't let their good looks fool you. After all, an AVS chrome hood shield provides maximum protection, just like every other AVS hood shield. Our chrome Ventvisors® keep rain out and let fresh air in, just like the original Ventvisor® has been doing for more than 70 years. Add chrome mirror covers, door handle covers, a tailgate handle cover and a fuel door cover, and you are ready to handle anything the road ahead has in store for you ... with style.

## Window Vents

Motorists have been relying on AVS to keep them cool and dry since the original Ventshade® took to the road more than 70 years ago. Since then, the design has become more aerodynamic and the materials more modern, but the benefits are the same. Whether it's the Ventvisor®, In-Channel Ventvisor®, Aerovisor® or the Original Ventshade®, you'll be cooler in the heat and keep dry and comfortable in the rain, all because you can keep your windows open just the right amount.

As the road ahead becomes the road behind, we'll continue to make improvements. But we will never lose sight of the simple, elegant design that made AVS famous.

## Ventvisor®

- Keeps rain out and lets fresh air in
- The original Ventvisor® design
- Custom applications are available for most cars (2 and 4 door), trucks, vans, SUVs and CUVs
- Helps to reduce heat buildup in parked vehicles by allowing windows to be kept partially open
- Easy to install with strong automotive grade tape
- Applications also available for Freightliner, International, Kenworth and Peterbilt

# Hood Shields

AVS Hood Shields provide the protection you need when the road throws you a curve. Whether you choose the original Bugflector®, the wrap-around Bugflector® II, the low-profile Hoodflector® or the Carflector®, you'll know your vehicle is protected by the best in the business.

Why is AVS the best? Each AVS Hood Shield model is custom engineered for the specific vehicle application and manufactured from rugged, impact-modified acrylic. It is at this point we step out of the box, because nobody else takes this final step: Every AVS hood shield is test fitted on an actual vehicle hood before it is allowed to leave our facility. That's why, when you choose AVS, you know your new hood shield will fit perfectly, install easily and provide great looking protection for years to come.

## NEW LEAF PAPER® environmental benefits statement

of using post-consumer waste fiber vs. virgin fiber

Lund International, Inc. saved the following resources by using New Leaf Reincarnation Matte, manufactured with electricity that is offset with Green-e® certified renewable energy certificates, 100% recycled fiber and 50% post-consumer waste, and processed chlorine free.

trees	water	energy	solid waste	greenhouse gases
266 fully grown	57,868 gallons	121 million Btu	12,660 pounds	21,392 pounds

Calculations based on research by Environmental Defense and other members of the Paper Task Force.
